PROFESSIONAL EXPERIENCE

Software Engineer (AI/ML) 10/2025 – Present
Silo Fortune Pvt Ltd Bengaluru - On Site

- Built production AI systems for agriculture and livestock: crop diagnostics, satellite intelligence, weather driven insights, multilingual advisories, and fertility analysis for cattle labs.
- Deployed multimodal AI workflows combining Google Gemini, Computer Vision, and Geospatial data to automate disease detection, phenological tracking, and multi language consulting for 92+ crop types in 12 Indian languages.
- Engineered market intelligence systems serving **7,000+ Indian mandis**, integrating forecast models and personalized crop recommendations; scaled Kisaan Sampurna to **50,000+ Google Play installs** and **3,500+ paid subscribers**.
- Designed cloud native backend services using FastAPI, PostgreSQL, Redis, and AWS with async request handling (immediate processing when workers are free, otherwise queued in Redis and retried); cut recurring LLM inference costs to near zero through multi level caching.

Applied ML Engineer (Part-Time, Contract) 09/2026 – Present
Alpify Technologies LLP Remote

- Built a lead-quality ML pipeline for an Alpify client, filtering fraudulent and anonymous Meta Ads leads and adding genuineness verification to a booking-slot flow that had no fraud layer. *(Reference: deepak@alpify.in)*

TECHNICAL SKILLS

GenAI: Google Gemini, Retrieval-Augmented Generation (RAG)
AI/ML: Computer Vision, Deep Learning, Transformers, CNNs, PyTorch, TensorFlow
LLM Engineering: LangChain, LangGraph, FAISS
MLOps & Cloud: Docker, AWS (S3, RDS, SageMaker, ECS Fargate), GCP (OCR, Vision API), Jenkins
Backend Engineering: FastAPI, Django, Flask, GraphQL, Pydantic, SQLAlchemy, Alembic, AsyncIO, RabbitMQ, Celery
Programming: Python, SQL, Cypher
Databases: PostgreSQL, Redis, Neo4j

KEY PROJECTS

for more projects: kishan-k.pages.dev/#projects

Kisaan Sampurna – AI-Powered Agricultural Advisory Platform Google Play Store

- Built a production agri AI platform with vision based disease detection, satellite telemetry (NDVI/EVI/NDWI), and multilingual advisories for **92+ crop varieties** in **12 Indian languages**, running on FastAPI and AWS ECS Fargate with Gemini workflows and multi tier Redis caching.
- *Tech Skills: FastAPI, Google Gemini, Computer Vision, PostgreSQL, AWS S3, Docker, SQLAlchemy, AsyncIO, Jenkins, Redis*

Agri-Expert Copilot – Knowledge Graph Advisory Bot for Kisaan Sampurna Live Demo

- Built a conversational agri-advisory copilot on a **Neo4j** knowledge graph of **164+ crops**, **1,900+ disease-treatment links**, and **19,000+ PIN codes**. A LangGraph engine runs multi-hop Cypher traversals to answer disease, dosage, phenology, and crop suitability queries, served via a Strawberry **GraphQL** API on FastAPI with RabbitMQ workers for async tasks.
- *Tech Skills: Neo4j, Cypher, GraphQL (Strawberry), LangGraph, FastAPI, RabbitMQ, Python*

Sentinel – Agentic Research Copilot for Indian Equities GitHub

- Coded a multi agent AI research platform for **NSE/BSE listed companies** using LangGraph, RAG, MCP based tool orchestration. Implemented hybrid retrieval, reranking, observability, and evaluation pipelines; developing QLoRA fine tuning on **Qwen-2.5-7B** for citation aware financial research.
- *Tech Skills: LangGraph, LangChain, QLoRA, Qwen 2.5, RAG, FAISS, PostgreSQL, FastAPI, Langfuse, Docker, AWS*

Gau Swastha – Multimodal VLM Cattle Disease & Health Diagnostics *In Development*

- Building an end-to-end veterinary screening platform leveraging **Google Gemini** multimodal VLMs for **31 cattle diseases** and a 27-way fecal condition taxonomy, with evidence-first visual reasoning and deterministic knowledge base linking in **PostgreSQL** via **Alembic**, automated **AWS S3** image workflows, and structured clinical triage reporting.
- *Tech Skills: FastAPI, Google Gemini, VLM, Computer Vision, PostgreSQL, SQLAlchemy, Alembic, AWS S3, Docker, Pydantic*

Gau Sampurna – AI-Powered Sperm Motility Analysis GitHub

- Built a computer vision pipeline for semen quality assessment using **YOLOv8** detection and **DeepSORT** tracking, with async video processing via FastAPI and Celery that computes motility metrics from microscopy videos within minutes.
- *Tech Skills: FastAPI, Celery, YOLOv8, DeepSORT, Computer Vision, AWS S3*

OPEN SOURCE CONTRIBUTIONS

NotifKit – Open-Source Notification Infrastructure notifkit.dev | GitHub

- One of 3 contributors building self-hosted notification infrastructure: a single `notify()` call handles push, email, SMS, and webhooks with fallback, retries, and durable workflows. *(Node.js, TypeScript, PostgreSQL, Redis Streams)*

EDUCATION

B.E. in Artificial Intelligence and Machine Learning 12/2021 – 07/2025
Ramaiah Institute of Technology, Bengaluru **CGPA: 8.6 / 10**

PUBLICATIONS

Performance Evaluation of Deep Learning Models for Predicting Alzheimer's Disease *IEEE, 2024*
Enhancing Predictive Maintenance with SHAP and LIME *ICAI – ARSSS, 2025*
